JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

but the chances of infected mosquitoes getting down to Savanilla and aboard ships are few.

Barranquilla has no active board of health. One was appointed about a year ago, but no physicians are among the members and no sanitary work has been done, nor has any action been taken toward the elimination of mosquitoes.

Each householder pays for carting the waste and garbage from his place, and as it is entirely a private matter many places are cleaned up only after months of accumulation.

I found mosquito-breeding barrels and other receptacles in various places, but no attention is paid to them.

COSTA RICA.

Reports from Limon, fruit port.

Acting Assistant Surgeon Goodman reports as follows: Week ended August 3, 1907. Estimated population, 6,000; general sanitary condition of this port and the surrounding country during the week, good.
